5. You should see the name of the file you want to import in the File to import field. Click Import file.

6. A confirmation page is displayed.
On import, all transactions in the file are validated to ensure the data is valid. Any transactions containing invalid data are rejected. Valid transactions are sent to the Wire Transmit queue for approval.
Multiple Approvals for Templates

Multiple approvals for templates provide you with the option to require multiple approvals for template additions, modifications and deletions. Use this feature for the following templates:

ACH Send Money
ACH Collect Money
Multiple Transfer
Template Based Wire Transfer

Template additions, modifications and deletions need to be approved by another Business Online user who is entitled to the template’s funding account. You should ensure that the number of approvals you require for each service does not exceed the number of users who are able to approve the request.

Approving Templates

When a template has been added, changed or deleted the confirmation message will inform the user the item requires approval.
To approval a pending template complete the following:

1. Click Transfers and Payments, the Transfers and Payments page appears:
2. Click the appropriate template approval link, for this example, the Approve Wire Templates link was chosen. The Approve Templates page appears:

Because of the similarity of this change across the services, page samples are only shown for the Wire process.
The Approve Templates page displays the templates that are pending approval, the number of outstanding approvals, and the action that is pending (new, change, or delete.)

3. You can view the details of a template by clicking the Template Name link.

4. When you are confident the details of the template(s) are correct, select the checkboxes of the templates you are approving, and click Approve. The Template Approval Confirmation page appears:

Clicking a column name under Credit/Destination Accounts only re-sorts the details displayed on the page. The new sort is applied to all of the details in the template.

**Edit Template**

The Edit Template page is accessed by clicking Edit Template on the View Template Details page.

The Edit Template page displays 20 details items at one-time. This page provides links to navigate through multiple pages of details. The Template Total field displays the total dollar amount for all of the details included in the template.
Clicking a column name under Credit/Destination Accounts only re-sorts the details displayed on the page. The new sort is not applied to all of the details in the template. To find a specific detail(s), you can use the new detail search feature available on the page.

1. The Search details link can be used to search for specific details. The ACH Template Detail Search page appears:
Enter the search criteria and click Search.

At least one field must contain search criteria and a minimum of three characters must be entered into a field. If more than one field contains search criteria, records that match all fields are returned.

The ACH Template Detail Search page is closed and the Edit Template Search Results page is displayed with the results of the detail search:
You can view all details associated with the template by clicking Show all details. If all details are displayed, page links are available for scrolling through the details.

When all template and detail changes have been made, click Continue. The Verify Template page is displayed:
The verification page displays the changed details (including detail import additions, updates, and deletes) with the changes highlighted.

You can view all details associated with the template by clicking View all details. If all details are displayed, page links are available for scrolling through the details. The changed details items remain highlighted when all details are displayed.
Click Save changes to save the template and the detail edits. The Template Confirmation page is displayed:
Advanced Authentication

Advanced Authentication Approval requires users to authenticate with a security code when approving ACH and wire transactions.

Industry best practice suggests use of both Advanced Authentication Sign On and Advanced Authentication Transaction Approval. However, Advanced Authentication Transaction Approval can be offered independently.

The One-Time Security Code page will appear when you click the transmit or approve buttons:

![One-Time Security Code](image)

1. Select the preferred choice of contact. If using Text Message the phone number must be registered for the Business Online User.

2. Click Continue. Depending on the communication option (telephone or text) chosen the following pages will be provided:
Telephone Authentication

The Business Online user will then receive an automated phone call that instructs the user to enter the one-time security code displayed on the Enter the Security Code dialog.

Click Phone Call completed. The Approval Confirmation page appears.
Text Message Authentication

The Business Online user will be prompted to enter a mobile phone number.

The mobile phone number must be registered for the Business Online User.

1. Click the Send Text Message button. The One-time Security Code page appears. The security code will be sent to the mobile phone number.

2. Complete the process by entering the One-time security code.
3. Click Submit, the Approval Confirmation page appears.
